00100, Nairobi, Kenya

PROFESSIONAL SUMMARY

Passionate and aspiring Data Analyst with a strong foundation in data exploration and cleaning, statistics, programming, and data visualization. Skilled in extracting insights from complex datasets using Python, SQL, and Power BI. I have completed IBM Data and ALX Science training and gained practical experience through various data projects. Eager to advance my skills in AI and Machine Learning, and to contribute to impactful projects that leverage data for real-world solutions.

SKILLS

TECHNICAL SKILLS

- Data Analytics & Management: Data analytics, data management, data security, compliance, data interpretation
- Programming & Development: Python, SQL, Java, C++, C, JavaScript, React
- Data Visualization: Power BI, Tableau
- Machine Learning & AI: Machine learning concepts, artificial intelligence understanding, predictive modeling, statistical analysis
- Tools & Platforms: Jupyter Notebooks, Google Colab, Google Workspace, Microsoft Applications

SOFT SKILLS

- Communication & presentation
- Collaboration & teamwork
- Problem-solving
- Attention to detail
- Adaptability
- Ethical practice
- Growth fostering

PROJECT EXPERIENCE

- **Sales Analysis and Reporting:** Analyzed retail sales data using Python and Power BI. Cleaned data, identified trends, and created an interactive dashboard for insights on sales growth and top products.
- **Customer Churn Prediction:** Built a logistic regression model to predict customer churn using Python. Conducted EDA and achieved a 78% model accuracy, helping to identify at-risk customers.

EDUCATION

MAY 2023 – AUGUST 2024 Certificate in Data Science/ ALX

SEPTEMBER 2022 – JANUARY 2023 IBM Data Science Practitioner Training/ Jomo Kenyatta University of Agriculture and Technology

SEPTEMBER 2021 – CURRENT Bachelor's in Information Technology/ Jomo Kenyatta University of Agriculture and Technology

REFEREES

Available upon request.
